Blue = Neutral Wire

Green / Yellow = Earth

******* STOP *******

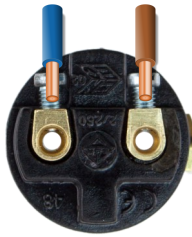

Please do not screw the lampholder together before reading these instructions!

SES | E14 | Small Edison Screw

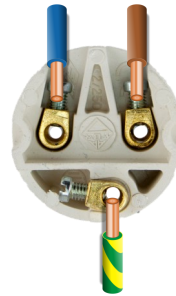

Metal Lampholder

Plastic Lampholder

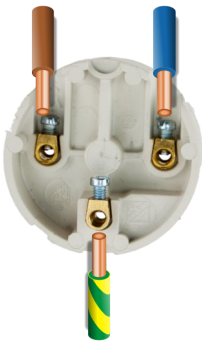

Metal Lampholder

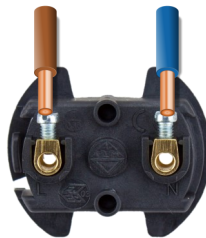

ES | E27 | Edison Screw

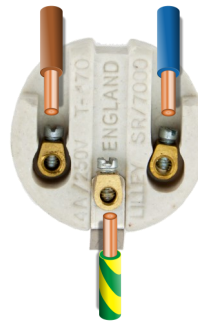

Metal Lampholder

Plastic Lampholder

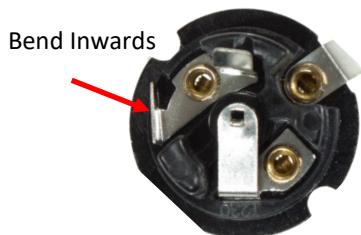

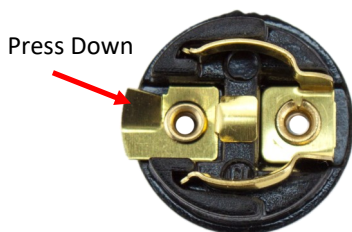

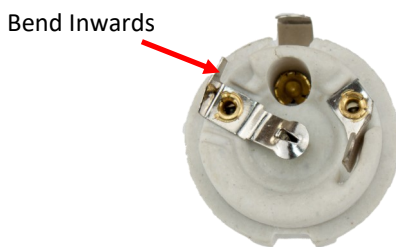

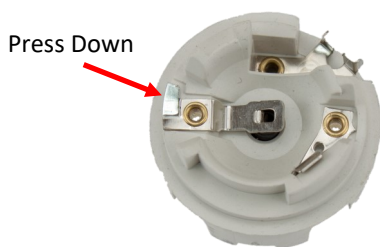

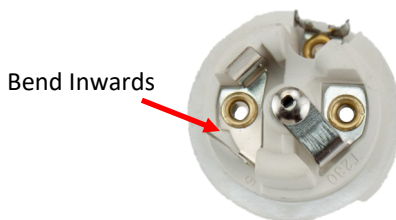

Metal Lampholder

Please ensure to check you have the correct lampholder before wiring. Further installation guides may be available for your lampholder, simply enter the lampholders SKU into our help guide site support.lampspares.co.uk

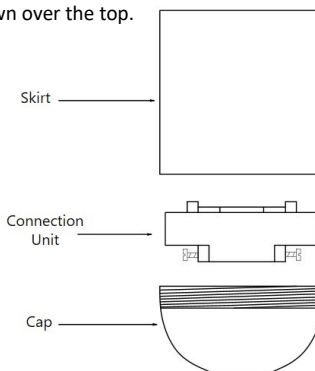

The connection units have a locking barb installed on them, this is to ensure the lampholder does not undo as you remove the light bulb.

Please see images below to locate the locking barb on your connection unit, the barb will need to be pressed down or bent inwards to unlock it.

Please Note:

The lampholder comes in 3 pieces, we screw together the cap and skirt to help protect it in transit, this will need to be unscrewed then installed as below, note the connection unit sits inside the cap then the skirt screws down over the top.
