And search for IS11 in the search box.

Ref:
IS11

Kit Contains:

1x E14 Lampholder
1x Wide Shade Ring
1x Cord Grip
1x 2 Core Cable Cord Set

Before you start please ensure you are competent to carry out electrical works and ensure the electricity is turned off.
If in any doubt stop what you're doing and seek professional advice.

Please visit our help centre as we have a full step by step guide online.

Step 1: Depending on how you are planning on using the kit you may need to run the cable through your light fitting prior to installing onto the lampholder.

Step 2: Separate the cord grip into the 2 parts then, screw the cord grip section with male thread into the base of the lampholder.

Step 3: Slide the top part of the cord grip onto the cable then push the cable into the bottom section of the cord grip and out through the base of the lampholder.

Step 4: Take the connection unit of the lampholder and connect the cable to it using the guide on other side of this leaflet.

Step 5: Once connected push the connection unit into the base of the lampholder, Then slide the cord grip cover up the cable and screw in the connecting cord grip section. Ensuring the cord grip is gripping the outer sleeving of the cable.

Step 6: Finally screw the top section of the lampholder onto the base of the lampholder, this will then complete the installation of the lampholder.

Step 7: Push the lampholder through the hole of the lamp or panel then use the wide shade ring and screw it onto the lampholder to secure it into place.

Wiring Of The Lampholder

(Neutral)

If you have any concerns or difficulties in connecting this product please contact us on details at the bottom of this manual.

All electrical parts confirm to BS 60238 and have full CE approval.

Certification can be obtained on request via email.

E14 Locking Barb

The locking barb is located in the image above, this will need to be pushed down to release the lampholder.

Please Note:

The lampholder comes in 3 pieces, we screw together the cap and skirt to help protect it in transit, this will need to be unscrewed then installed as below, note the connection unit sits inside the cap then the skirt screws down over the top.
